

Public Lectures
Assistant Professorship in Morphological Variability

Wednesday, 27. September 2017

09:00 – 11:50

Irchel Campus

Winterthurerstrasse 190

8057 Zürich

Y23-G-04

09:00 – 09:20

András Jakab, MD, PhD

Center for MR-Research, University Children's Hospital Zürich

“Every brain tells a story” - anchoring developmental imaging to evolutionary medicine research

09:30 – 09:50

Elena Kranioti, MD, PhD

Dept. of Archaeology, University of Edinburgh

Human anatomical variation: old concepts through a new prism

10:00 – 10:20

Carl Stephan, PhD

School of Biomedical Sciences, University of Queensland

Face prediction from skulls: integrating morphology, genetics and statistics for a bona fide approach

10:30 – 10:50

Coffee break

10:50 – 11:10

Rui Diogo, Associate Professor, PhD

Dept. of Anatomy, Howard University College of Medicine, Washington

Macroevolutionary Medicine and Evolutionary Developmental Pathology. Linking comparative anatomy, human evolution, development, birth defects and medicine.

11:20 – 11:40

Adrian Jaeggi, Assistant Professor, PhD

Department of Anthropology, Emory University Atlanta

Evolutionary mismatch and trade-offs in health and disease
